Warming Up Session

3:00-3:10pm NBS Video Showcase

The session kicks off with an engaging NBS video showcase, offering an inspiring introduction to Nature-based Solutions. Learn how to seamlessly integrate the NBS approach into every facet of landscape architecture planning, creating sustainable and impactful designs that harmonize with nature.

3:10-3:30pm My NBS Initiatives

**Assoc Prof LAr Dr
Nor Atiah Ismail**

INSTITUTE OF LANDSCAPE ARCHITECTS MALAYSIA (ILAM)

my nbs
Nature-based Solutions

Discover the new direction of ILAM in embracing **Nature-based Solutions for landscape architectural practices** through the introduction of **MyNBS Initiatives**. Join us to explore how you can contribute and play a role in this transformative movement towards sustainable design.

NBS^xpress Lite

3:30-3:50pm Serampang Dua Mata

This talk explores how government initiatives are turning water retention ponds and lakes into multifunctional spaces. Learn how these areas not only serve as recreational hubs but also act as 'city sponges' to manage stormwater and enhance urban resilience to climate change.

Urban Lowland Environment

5:30-6:00pm

Building Wetland Communities: The Nature-Based Way

Uncover the transformative power of nature-based solutions in township planning. This session explores how integrating wetlands into urban designs not only creates vibrant habitats for flora and fauna but also addresses pressing urban issues like flooding, urban heat islands, and biodiversity loss. Learn how these innovative solutions foster a healthier, more sustainable living environment for communities while enhancing resilience against climate challenges.

Ain Syafikah Zaini
Gamuda Parks

Highland Forest Environment

6:00-6:30pm

Building Forest Communities: The Nature-Based Way

Discover how the nature-based solution approach can be effectively applied to highly sensitive sites, such as forests and highlands. This session delves into strategies for preserving ecological integrity, enhancing resilience, and balancing development with conservation in these fragile environments.

Urban Biodiversity

6:30-7:00pm

A Journey into Urban Biodiversity

Explore how township planning can bring back biodiversity to urban areas through innovative design and nature-based solutions. This session also introduces methods to measure the impact of these initiatives, ensuring sustainable and thriving ecosystems in cityscapes.
